VICTOR RAMAYRAT

Marketing Engineer | AI Search (AEO / GEO), Content Engineering, HubSpot Workflows, AI Agents

San Jose, CA | (408) 707-2626 | victor@ramayrat.com | linkedin.com/in/victorramayrat | victor.ramayrat.com

SUMMARY

Marketing engineer with 10+ years inside marketing teams at enterprise, scale-up, startup, and agency companies. A marketer who builds: finds slow manual marketing work and replaces it with systems that teams use every day. Runs AI search (AEO and GEO) programs: visibility audits, schema, answer-first content, and AI crawler access. Builds HubSpot custom objects, forms, and workflow automation. Designs AI agents and workflows for content drafting, competitive research, page audits, and reporting. Works embedded with client marketing teams, trains practitioners, and turns successful work into templates and playbooks that others reuse. Explains technical choices in plain language to practitioners and senior marketing leaders.

SKILLS

AI Search (AEO / GEO): AI search visibility audits, answer engine optimization (AEO), generative engine optimization (GEO), query fan-out coverage, answer-first content and FAQ structure, schema and structured data (JSON-LD), llms.txt, AI crawler access (GPTBot, ClaudeBot, PerplexityBot), technical SEO

Content Engineering: content briefs, competitive research, page audits for structure and readability, content templates, AI-assisted content workflows, editorial standards and brand voice review, interactive content tools with gated downloads

AI Agents & Workflows: Claude, Claude Code, OpenAI APIs, agentic workflows, prompt and instruction design, output review for accuracy and brand voice, n8n, Zapier, webhooks

Marketing Automation & CRM: HubSpot (administration, workflows, custom objects, custom properties, forms, lifecycle stages, lead scoring, lead routing), Salesforce, Eloqua, Drift, CRM data migration (Mailchimp, Zoho), data cleanup

Data & Analytics: GA4, Google Tag Manager, Segment CDP, RudderStack, Google BigQuery, SQL, event tracking, full-funnel attribution, performance reporting

Web & CMS: WordPress, Elementor, Webflow, Framer, Contentful, Sanity, Next.js, React, HTML, CSS, JavaScript, TypeScript, Vercel, Cloudflare

Ways of Working: customer-facing delivery, practitioner training and adoption, playbooks and templates, partner programs, stakeholder management, several client projects at the same time

EXPERIENCE

Pegasus Strategy Co. | February 2025 - Present

Marketing Engineer, GTM Engineering (Fractional; B2B SaaS and nonprofit clients) | *Remote*

- Work embedded inside client marketing teams as the marketing engineer. Turn requests into plans and run projects for several clients at the same time.
- **One Purse (nonprofit):** Moved the marketable database from Mailchimp to HubSpot. Analyzed, cleaned, and moved donor, contact, and event lead records from Zoho to HubSpot.
- **One Purse:** Designed and built HubSpot custom objects for Events Ticketing and Purse Donations. Each donation record has a unique donation ID and a barcode or RFID field that tracks the purse from donation to sale. Each record links to the donor contact.
- **One Purse:** Built a two-step donation intake form for an iPad kiosk at live events. The first step captures the email address and starts a HubSpot workflow. Added a constituent type field to segment donors and other contacts.
- **One Purse:** Replaced the website forms with HubSpot forms and built workflow automation for newsletter subscriptions.
- **SaaS clients:** Administer HubSpot properties, pipelines, lifecycle stages, lead scoring, and routing workflows. Connect website forms and events to HubSpot with Segment, RudderStack, Zapier, and n8n.

MarketGrowth CX | January 2025 - Present

Founder & Publisher; Marketing Technology Consultant | *San Jose, CA*

- **Canine Companions (canine.org, national nonprofit):** Ran an AI search visibility audit to measure how AI assistants such as ChatGPT, Perplexity, Gemini, and Google AI Overviews show and cite the organization.
- **Canine Companions:** Added schema (JSON-LD) to the WordPress site for the organization, FAQs, and articles. Changed key pages and FAQs to an answer-first format that covers the follow-up questions in query fan-out.
- **Canine Companions:** Published llms.txt and set robots.txt rules for AI crawlers such as GPTBot, ClaudeBot, and PerplexityBot.
- **AgentLedGTM (agentledgtm.com):** Publish a site for agent-led growth teams. Built interactive tools with gated downloads, including a 40-check AI Search Visibility Audit and a Loop Campaign Builder. Published the research report "The State of Marketing Engineering for 2026." Run a weekly industry news workflow that feeds a subscriber newsletter.

- **A/GEO Agency (ageoagency.com):** Founded an AI-native AEO and GEO agency for small businesses and nonprofits. Designed a white label partner program with a partner portal, content, and email templates, so partners can resell the service to their own clients.
- **Orbytt (orbytt.ai):** Co-founder and CTO of a community and talent platform with courses, verified certificates, job postings, and a member directory. Own the platform architecture and production engineering.
- Publish four web properties (AgentLedGTM, Orbytt, SuperHustle, Mission:Told). Through Socient.net, deliver website builds, marketing automation, and AI visibility audits for nonprofit and social enterprise clients.

PwC, Products & Technology | December 2019 - October 2024
Senior Manager, Digital Performance | *San Francisco, CA*

- Owned the web operations stack for PwC product brands (Risk, Workforce, Wealth Compass): architecture, development, and ongoing management.
- Connected all product sites to the martech stack through Google Tag Manager and the Eloqua Forms API for full-funnel reporting.
- Built lead capture forms that sent qualified leads to the direct sales team. Led conversion rate optimization across go-to-market campaigns.
- Worked every day with demand marketing, sales, product, data, and engineering partners across a multi-product portfolio.

Palo Alto Networks | December 2018 - August 2019
Marketing Technology Innovation Developer | *Santa Clara, CA*

- Ran Drift conversational AI across global marketing sites. Raised sales rep adoption from 50% to 80%. Sourced leads that added over $2M in monthly pipeline.
- Designed chat playbooks for major company events. Registration grew by over 50% year over year.

Redkix (acquired by Meta) | December 2016 - July 2018
Head of Marketing & Growth; Marketing Engineer, Growth Operations | *San Mateo, CA*

- Built the martech stack from scratch: Salesforce, Segment CDP, and WordPress.
- Built an event data pipeline with Segment and Google BigQuery for attribution from source (paid, owned, earned) to product usage across web, iOS, and Android.
- Ran the growth program through the acquisition by Meta: acquisition funnels, web experience, lifecycle, experiments, and analytics.

Tradeshift | February 2015 - December 2016
Digital Marketing Engineer; Senior Web Developer | *San Francisco, CA*

- Technical lead for the marketing team. Built and ran tradeshift.com and all localized international sites.
- Owned the marketing website end to end: platform, performance, experiments, and integrations. Ran release operations between brand, demand generation, and engineering teams.
