VICTOR RAMAYRAT

Marketing Engineer | AI Search Growth Marketer | Web Strategy and Innovation | Marketing Technology Manager
San Jose, CA | (408) 707-2626 | victor@ramayrat.com | linkedin.com/in/victorramayrat | victor.ramayrat.com

SUMMARY

I am a marketer who builds. For 10+ years I have worked where marketing, the website, and the technology behind it meet. At PwC, I owned the web experience for a group of B2B product brands, each with its own buyers, and connected every site to the sales team. At Tradeshift and Redkix, I ran the website and the growth systems through fast growth and an acquisition by Meta. Today I help marketing teams get found in AI search, plan and fix the paths that visitors take through a site, and turn slow manual work into workflows the team keeps using. I do my best work inside the team: I learn how people work, build with them, and stay until they can run it on their own.

SKILLS

Web strategy: visitor journeys from first visit to sales conversation, site structure and navigation, content planning, conversion paths, testing and analytics

AI search: AEO and GEO audits, schema (JSON-LD), llms.txt, answer-first pages and FAQs, AI crawler access

Marketing technology: HubSpot (workflows, custom objects, forms), Salesforce, Eloqua, Drift, Google Tag Manager, GA4, Segment, BigQuery

Building: WordPress, Webflow, Next.js, Sanity, Contentful, Claude Code, n8n, Zapier, Gradual

How I work: embedded with marketing teams, practitioner training, playbooks and templates, clear plans for unclear requests

EXPERIENCE

Pegasus Strategy Co. | February 2025 - Present
Marketing Engineer Consultant (Fractional; B2B SaaS and nonprofit clients) | *Remote*

- I work inside client marketing teams as their marketing engineer. I turn requests into plans and run projects for several clients at once.
- **One Purse (nonprofit):** Moved the marketing database from Mailchimp, and donor, contact, and event records from Zoho, into HubSpot. Built custom objects for event ticketing and purse donations, so the team can track each purse from donation to sale. Added a kiosk intake form for live events, HubSpot forms on the website, and newsletter workflows.
- **ITIL.com community (PeopleCert):** Build the community for ITIL practitioners on Gradual.
- **SaaS clients:** Run HubSpot pipelines, lifecycle stages, lead scoring, and routing. Connect website forms and events to HubSpot with Segment, Zapier, and n8n.

MarketGrowth | January 2025 - Present
Founder & Publisher; Marketing Technology Consultant | *San Jose, CA*

- **Canine Companions (canine.org), a Socient.net client:** Led AEO and GEO work for this national nonprofit. I audited how AI assistants such as ChatGPT, Perplexity, and Google AI Overviews present the organization, added schema to the WordPress site, rewrote key pages and FAQs in an answer-first format, and opened the site to AI crawlers with llms.txt and crawler rules.
- **AgentLedGTM (agentledgtm.com):** Publish a site for agent-led growth teams. Built interactive tools with gated downloads, including a 40-check AI search visibility audit.
- **A/GEO Agency (ageoagency.com):** Founded an AEO and GEO agency for small businesses and nonprofits, with a white label program so partners can offer the service to their own clients.
- **Orbytt (orbytt.ai):** Co-founder and CTO of a community and talent platform with courses, certificates, job posts, and a member directory.

PwC, Products & Technology | December 2019 - October 2024
Senior Manager, Digital Performance | *San Francisco, CA*

- Owned the web experience for PwC product brands (Risk, Workforce, Wealth Compass), from site architecture and page systems through build and ongoing management.
- Planned the paths from product pages to lead forms. Qualified leads went straight to the direct sales team.
- Led conversion work across go-to-market campaigns. Used test results and tracking data to decide what to change next.
- Connected every product site to Google Tag Manager and the Eloqua Forms API, so marketing could report on the full funnel.
- Worked every day with demand marketing, sales, product, data, and engineering across a multi-product portfolio.

Palo Alto Networks | December 2018 - August 2019
Marketing Technology Innovation Developer | *Santa Clara, CA*

- Connected website visitors with sales reps through Drift chat on the global marketing sites. Rep adoption grew from 50% to 80%, and chat leads added over $2M in monthly pipeline.
- Designed chat playbooks for major company events. Registration grew by over 50% year over year.

Redkix (acquired by Meta) | December 2016 - July 2018
Head of Marketing & Growth; Marketing Engineer, Growth Operations | *San Mateo, CA*

- Built the marketing stack from the start: Salesforce, Segment, and WordPress.
- Built an event data pipeline with Segment and BigQuery. It showed each user's path from first source to product use on web, iOS, and Android.
- Ran the growth program through the acquisition by Meta: funnels, web experience, lifecycle, experiments, and analytics.

Tradeshift | February 2015 - December 2016
Digital Marketing Engineer; Senior Web Developer | *San Francisco, CA*

- Technical lead for the marketing team. Built and ran tradeshift.com and all localized international sites.
- Owned the website end to end: platform, performance, experiments, and integrations. Ran releases between brand, demand generation, and engineering.

EDUCATION

Master's in Artificial Intelligence, Woolf University (in progress)

M.B.A., National University

B.S., Information Systems, Fresno State

Associate Degree, Community College of the Air Force

Claude Architect (in progress); Cybersecurity for Web Applications, CodePath.org, 2018
