

VICTOR RAMAYRAT

Marketing Systems Engineer | Marketing Website Engineering, GTM Stack Integrations, Lead Capture

San Jose, CA | (408) 707-2626 | victor@ramayrat.com | linkedin.com/in/victorramayrat | victor.ramayrat.com

SUMMARY

Marketing systems engineer with 10+ years of full-stack work on B2B marketing websites and the GTM stack behind them. Writes production HTML, CSS, JavaScript, and TypeScript for marketing websites. Owns website technical health: page speed, Core Web Vitals, accessibility, Google Tag Manager, technical SEO, and third-party integrations. Connects websites to Salesforce, HubSpot, Eloqua, and Segment through form APIs, webhooks, and event data pipelines. Builds in Framer, Webflow, WordPress, Contentful, Sanity, and Next.js. Turns unclear requests into technical plans with clear tradeoffs, and explains those tradeoffs to non-technical marketing stakeholders.

SKILLS

Marketing Website Engineering: HTML, CSS, JavaScript, TypeScript, React, Next.js, Framer, Webflow, WordPress, Contentful, Sanity, GatsbyJS, JAMstack, Vercel, Cloudflare

Website Technical Health: page speed, Core Web Vitals, accessibility (WCAG, Section 508), technical SEO, schema and structured data (JSON-LD), Google Search Console, third-party script management

Tag Management & Analytics: Google Tag Manager (GTM), GA4, Segment CDP, RudderStack, Google BigQuery, SQL, event tracking, full-funnel attribution

GTM Stack Integrations: Salesforce, HubSpot (administration), Eloqua Forms API, Drift, REST APIs, webhooks, data pipelines, CRM and marketing automation integrations

Forms & Lead Capture: front-end form systems, form field configuration and validation, form-to-CRM integrations, lead routing, lead scoring, lifecycle stages

Experimentation & CRO: A/B testing, conversion rate optimization (CRO), landing page tests, growth experiments

Automation & AI: n8n, Zapier, Claude Code, Cursor, Claude and OpenAI APIs, agentic workflows

Ways of Working: technical roadmaps, technical debt management, scoping ambiguous requirements, tradeoff analysis, stakeholder communication, several concurrent projects, contractor and agency management

EXPERIENCE

Pegasus Strategy Co. | February 2025 - Present

Marketing Engineer, GTM Engineering (Fractional, Series A to C B2B SaaS) | Remote

- Own the technical layer of client marketing websites: site builds, page speed, technical SEO, schema, tag management, and third-party integrations.
- Build and ship marketing websites in Next.js, React, TypeScript, Framer, Webflow, WordPress, Contentful, and Sanity, with deployment on Vercel.
- Administer HubSpot CRM: properties, pipelines, lifecycle stages, lead scoring, and lead routing and nurture workflows.
- Connect website forms and events to HubSpot with Segment, RudderStack, Zapier, and n8n webhook workflows.
- Build AI-enabled, self-service web systems with Claude Code and Cursor. Lean marketing teams use these systems to scale content, events, and regional marketing.
- Work as the only engineer inside marketing teams. Scope requests into technical plans and run projects for several client companies at the same time.
- Sites: ForwardGTM.com, PegasusStrategy.co, EdgeMonsters.dev, PeopleCert Community.

MarketGrowth | January 2025 - Present*Founder & Publisher* | San Jose, CA

- Publish four web properties (AgentLedGTM, Orbytt, SuperHustle, Mission:Told). Own the websites, technical SEO, schema, llms.txt, and AI search visibility programs.
- Co-founder and CTO of Orbytt (orbytt.ai), a community and talent platform. Own platform architecture and production engineering.
- Through Socient.net, deliver website builds, marketing automation, and AI visibility audits for nonprofit and social enterprise clients.

PwC, Products & Technology | December 2019 - October 2024*Senior Manager, Digital Performance* | San Francisco, CA

- Owned the web operations stack for PwC product brands (Risk, Workforce, Wealth Compass): architecture, development, and ongoing management.
- Connected all product sites to the martech stack through Google Tag Manager and the Eloqua Forms API for full-funnel reporting.
- Built lead capture forms on the Eloqua Forms API that sent qualified leads to the direct sales team.
- Led conversion rate optimization across go-to-market campaigns. Delivered sites and page systems that generated qualified leads for direct sales.
- Worked every day with demand marketing, sales, product, data, and engineering partners across a multi-product portfolio.
- Tech stack: JAMstack, GatsbyJS, Contentful, WordPress, GA4, Google Tag Manager, Eloqua.

Palo Alto Networks | December 2018 - August 2019*Marketing Technology Innovation Developer* | Santa Clara, CA

- Ran Drift conversational AI across global marketing sites. Raised sales rep adoption from 50% to 80% and sourced leads that added over \$2M in monthly pipeline.
- Designed chat playbooks for major company events that increased registration by over 50% year over year.

Redkix (acquired by Meta) | December 2016 - July 2018*Head of Marketing & Growth; Marketing Engineer, Growth Operations* | San Mateo, CA

- Built the martech stack from scratch: Salesforce, Segment CDP, and WordPress.
- Built an event data pipeline with Segment and Google BigQuery for end-to-end attribution from source (paid, owned, earned) to product usage across web, iOS, and Android.
- Ran the growth program through the acquisition by Meta: acquisition funnels, web experience, lifecycle, experiments, and analytics.

Tradeshift | February 2015 - December 2016*Digital Marketing Engineer; Senior Web Developer* | San Francisco, CA

- Technical lead for the marketing team. Built and ran tradeshift.com and all localized international sites.
- Owned the marketing website end to end: platform, performance, experiments, and integrations.
- Ran release operations between brand, demand generation, and engineering teams.
